*Download Evergo App
Google Play or App Store*

RFID card

Authentication with RFID cards

They can have your companies branding and can be incorporated into any customer loyalty program that has the brand through our head-end system.

My Evergo

We connect you so you can charge from home

Contact us to learn more about our residential chargers.

EVERGO has an In-app function so that users can properly manage the chargers in their residences or in their offices.

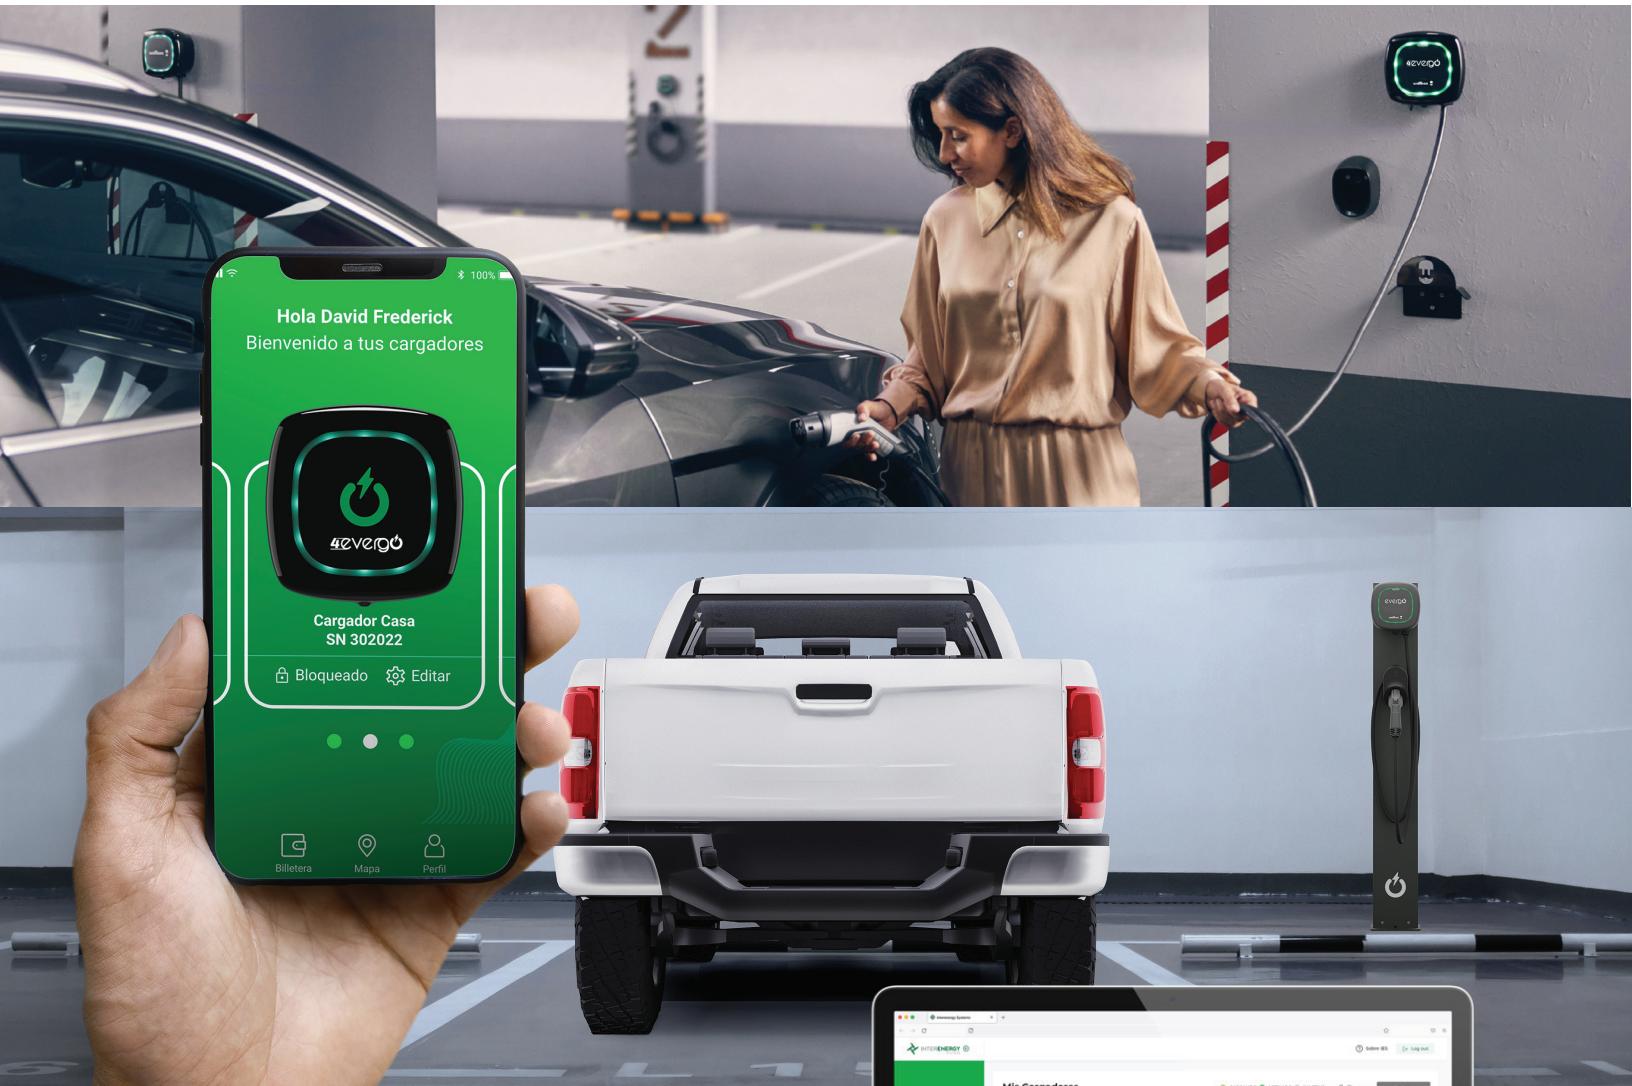

Through these functions the user will be able to see on the map your home charger for use exclusive, you will be able to control it, start and stop the load, as well as timing it; see the energy used and extract reports on the cargo handling. All this within same ecosystem in which you can visualize the public charge.

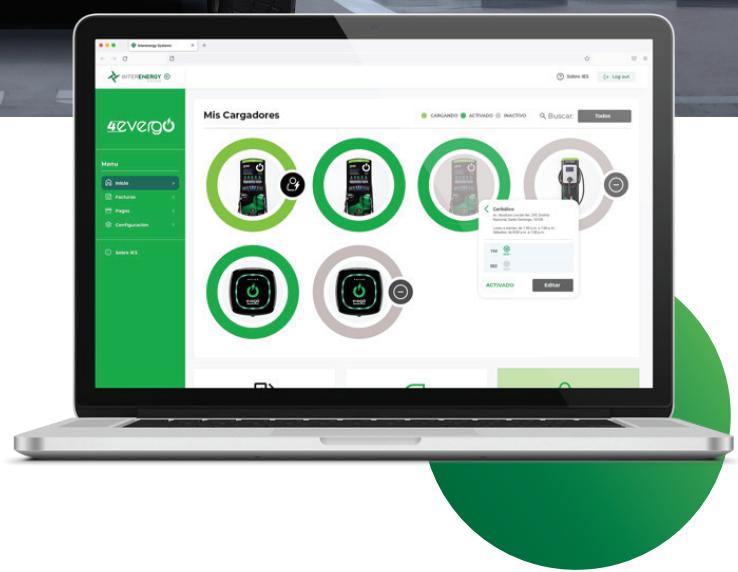

Evergo Fleet

Tool designed by InterEnergy Systems Dominicana for EVERGO that allows the operation of smart chargers in charging yards for electric vehicles.

evergo
FLEET
CONNECTED FORWARD

This platform has functions that allow load management individual and in groups of loaders, controlling parameters according with preconfigured rules, thus facilitating the control of the fleet and of the energy resources of the yard.

Cargadores
